Accompanying Persons	\$150	\$200
Day Rate	\$175	\$200
Pre-Conference Workshop	\$125	\$175
Post-Conference Tour	\$425	---

Conference web site: <http://iufrossf2012.org/>

Science for Solutions

Now, more than ever, solutions are needed to help mitigate and avoid the threats facing forests. This conference will focus on the issues confronting small-scale forest owners around the world and the solutions that can benefit landowners, society, and the natural environment.

Pre-Conference Workshop *Social Network Analysis (SNA)*

People have a variety of networks they formally or informally participate in. To what extent can people's social networks influence forest conservation? Attend this workshop and learn how to begin using SNA to gain insight into the effect of social networks on small-scale forestry.

Post-Conference Tour

Head north into Vermont. Visit with private woodland owners, stop at a community forest, and enjoy quintessential New England foliage along the way.
